

P7620A

Industrial Pressure Transmitters

PRODUCT DATA

GENERAL

The P7620A industrial pressure transmitters are ideal for many general purpose industrial applications when considering the performance, reliability and cost. The output signal of the sensing bridge is converted to be a standardized current signal through surface mount technology circuit board. This high level signal output with very low noise system is packaged in a rugged stainless steel housing to resist the harsh and extreme environment conditions. Each transmitter is inspected and calibrated to ensure it's 100% quality.
