H47 series

HUMIDITY/TEMPERATURE CONTROLLER

Specification Data

GENERAL

H47 series HUMIDITY/TEMPERATURE CONTROLLER is designed for control environment humidity and temperature. It provides 1 or 2 stages control. For example: 2 stages control for humidity, 2 stages control for temperature, or 1 stage control for humidity and another for temperature. It could be used in different application environment as well.

SPECIFICATIONS

Switch pattern

Temperature / Humidity

Humidity

Sensor Element : CMOS

Measurement Range: 0~100%RH

Signal Output : RELAY

Motionless belt : \pm 3 %RH or \pm 5 % RH Accuracy : \pm 4.5%RH (at 25°C, 20~80%RH) Long Term Stability : 1%RH; typical at 50% RH

in five years

Temperature

Temp Sensor: CMOS

Measurement Range : -40°C ~ 100°C

Signal Output: RELAY

Motionless belt : \pm 1°C or \pm 3°C Accuracy: \pm 0.5°C at 25°C

Long Term Stability: ± 0.25°C per year

Power Supply

85~265 or 24 VAC/VDC ±10%

Working temperature

Room type -30°C ~ +70°C OSA type -40°C ~ +70°C 5% ~ 95% RH without condensation

Storage Temperature

-50°C ~ +85°C

Housing Material: Plastic (ABS) Flame retarded acc. to UL94-V2

Protection Standard

Room type IP30 OSA or Immersion IP65

Calibration

Factory calibrated

MODEL NUMBER

H47A1001	LED Humidistat/Thermostat selectable, 1 stage, Space mount
H47A2003	LED Humidistat/Thermostat selectable, 1 stage, remote sensor, Front door mounted
H47A2005	LED Humidistat/Thermostat selectable, 1 stage, remote sensor, Cabinet mounted on DIN-rail
H47B1001	LED Humidistat/Thermostat selectable, 2 stages, Space mount
H47B2003	LED Humidistat/Thermostat selectable, 2 stages, remote sensor, Front door mounted
H47B2005	LED Humidistat/Thermostat selectable, 2 stages, remote sensor, Cabinet mounted on DIN-rail
