

4-20 mA Room Temperature Sensors

Figure 1. Room Sensor.

The room housing incorporates ventilation slits around the perimeter for accurate sensing of the controlled space. The Siemens logo is also featured on the front.

The sensor mounts either directly on drywall or on a 2 x4 box with an accessory (see *Accessories Ordering Information*). No calibration or maintenance is required.

Description

The 4-20 mA room temperature sensors provide input for accurate loop powered temperature sensing (detecting) via a 20 AWG twisted, shielded cable pair. The loop current varies according to the temperature being measured. Several models are available with different temperature ranges for sensing applications.
