

Butterfly Valves PN 6, PN 10, PN 16

VKF46...
VKF46...TS

- Grey cast iron housing EN-GJL-250 (to DN 300)
nodular cast iron housing EN-GJS-400-15 (from DN 350)
- DN 40...600
- k_{vs} 50...29300 m³/h
- For fitting between PN 6, PN 10, PN 16 counter-flanges to ISO 7005
- Tight-closing in accordance with EN 12266-1, leakage rate A
- No maintenance required
- Optional ASK46... manual adjuster (to DN 400)
- Optionally equipped with electromotoric actuators SQL35.00, SQL85.00 or SQL36E...

Use

For use as motorised or manual control or shut-off valves in heating, ventilation and air conditioning systems, in shipbuilding and in power station technics

- In open and closed circuits
- For 2-position controls (open/closed)
- For 3-position controls
- For boiler, chiller and cooling tower sequencing circuits
- To open or close the flow to a heat exchanger or to complete plant sections

Order

Butterfly valve, actuator resp. manual adjuster or mounting kit must be ordered separately.

When ordering please specify the quantity, product name and type code.

Example: 1 Butterfly valve VKF46.50
1 Manual adjuster ASK46.1

Delivery

Butterfly valve, actuator, manual adjuster and mounting kit are packed separately.

Mechanical design

Butterfly valve

Ring format, grey cast iron or nodular cast iron housing with EPDM liner and multiple shaft bearing.

The liner is also used to seal the flange. There is thus no contact between the medium and the valve housing.

The valve has a swing-through disc (angle of rotation 360°). The position of the valve disc is indicated by a notch on the front of the shaft.

Sizing diagram

- $\Delta p_{v,100}$ = Differential pressure across the fully open butterfly valve by a volume flow \dot{V}_{100}
- \dot{V}_{100} = Volume flow through the fully open butterfly valve
- 100 kPa = 1 bar \approx 10 mWC
- 1 m³ / h = 0.278 l/s water at 20 °C

Flow characteristic

Engineering notes

Single flange mounting is possible: DN 20...250: 300 kPa
DN 300...600: 200 kPa

The VKF46... butterfly valves can accommodate flow in either direction.

Warning

To avoid pressure shocks on the butterfly valve, the VKF46... must be driven to its fully open position (either manually or via positioning signal Y1) prior to activating the pump(s).

Mounting notes

The Mounting Instructions 4 319 0198 0 are enclosed in the product packaging.

VKF46... butterfly valves can be mounted in PN 6, PN 10, PN 16 applications. Use VKF46.450...600 in PN 16 applications only!

Do not use additional flange sealings.

Orientation

Upright to horizontal

Maintenance

The VKF46... butterfly valves require no maintenance.

Caution

Before performing any service work on the valve, actuator or mounting kit:

- Switch off the pump and power supply
- Close the main shut-off valves in the pipework
- Release pressure in the pipes and allow them to cool down completely

If necessary, disconnect electrical connections from terminals.

The valve must be re-commissioned only with the manual adjuster or the actuator correctly assembled.

Disposal

Before disposal the valve must be dismantled and separated into its various constituent materials.

Legislation may demand special handling of certain components, or it may be sensible from an ecological point of view.

Current local legislation must be observed.

Warranty

The technical data given for these applications is valid only in conjunction with the Siemens actuators as detailed under «Equipment combinations».

All terms of the warranty will be invalidated by the use of actuators from other manufacturers.
